BlueBay Asset Management

Founded in 2001, and acquired by Royal Bank of Canada in 2010, BlueBay Asset Management is one of Europe's largest managers of fixed income credit and alternative investment strategies.

An overview of the client engagement

Carillion Communications liaised with BlueBay in regard to an AV project upgrade, there was a few steps that took place to ensure a successful project:

- Review meeting room- client/user requirements
- Site review: Existing rooms set-up, equipment and infrastructure recording.
- Client demo & equipment testing: Barco Clickshare/ client network configuration
- Project design: Statement of work, Infrastructure & system schematic drawings
- Client Approval: Scope of work and commercials

The results

Improved meeting room standards- promoting meeting room utilisation & technology use. This was achieved by creating room types for the four meeting rooms.

Type 1: Presentation only

- Presentation to display via wireless Barco Clickshare
- Audio via in-ceiling speakers
- Control of the system via 7" Touch panel

Type 2: Presentation with video conferencing

- Presentation to display via wireless Barco Clickshare
- Cisco Video conferencing integration
- Control of the system via 7" Touch panel

This approach meant that each meeting room had the same look and feel as well as control point, a 7" Touch panel, which had added features depending on the video collaboration requirement.

Project overview

Project: Meeting room technology upgrade

Objective: To improve overall technology experience and meeting room utilisation

Location: Mayfair, London

Tech spec:

Large format display's
Wireless presentation
Intuitive touch panel control
Cisco video collaboration integration
Centralised control processing
